

The budget Queue Management System

A small and medium business, similar to larger companies, requires to be effective when dealing with customers. While a comprehensive queuing system with smart features and a great range of accessories could feel to be 'out of the league', sometimes a simple, but 'hardworking' solution is all that is needed. We designed the NanoQ system to support those who are willing to give their customers the best service, without spending a fortune on the technology supporting them. NanoQ is simple, cost-effective and scalable to meet the everyday challenges of visionary entrepreneurs.

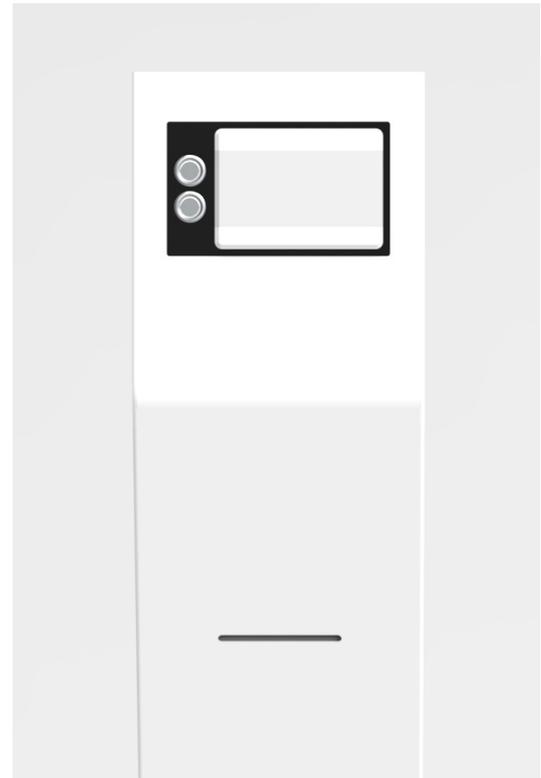

NanoQ

QUEUE MANAGEMENT SYSTEMS

➤ TICKET DISPENSERS

Features and benefits

- Back to the basics** NanoQ features pushbuttons instead of touchscreen to select a service. The number of pushbuttons is customizable between 1 and 8. The service descriptions can be simply printed and displayed next to their pushbuttons. NanoQ is using a special mainboard instead of a PC making the operation and maintenance much easier. With its simple design and slim body it can be the ideal element of every interior design.
- Reports to improve business** While the operation of NanoQ is based on a very simple principle, the system is able to provide a set of basic reports and statistics. The software is web based, accessible using a web browser from any device connected to the same network. The reports will allow managers and business owners to improve their service and operation efficiency, serving more clients, increasing sales and productivity.
- One body - many faces** NanoQ can be adapted and customized to fit into any environment. Pharmacies, bakeries, café's, restaurants, sport clubs, museums, post offices, mobile shops, city councils, clinics just to name a few, can all benefit from having a professional customer service solution at a budget cost.

TECHNICAL SPECIFICATION

Pushbuttons	1, 2, 8
Printer	3" thermal printer
Printer power supply	24 VDC
Tickets	80 mm wide paper roll
Housing	metal case, black or white
Characteristics	Special PC free hardware with custom developed integrated board LAN connection Optional RF (radio frequency) receiver Micro SD for storage Passive cooling
Recommended max. nr. of cashiers/advisors	10
Recommended max. nr. of tickets printed daily	1000

SIZES

NanoQ 1 and NanoQ 2 (W x D x H):	200 x 270 x 1321 mm
NanoQ 8 (W x D x H):	230 x 283 x 1408 mm
